Patents and Trade Secrets: IP Protection of AI in Digital Health and Wearable Devices

Artificial Intelligence (AI) has expanded rapidly in many industries, particularly health care, ranging from radiological imaging, clinical diagnosis, drug discovery, and cardiac software that uses AI to guide users to fitness training and equipment.

In an article published by the American Health Law Association, attorneys Aseet Patel and Y. Michelle Zhang explore the various IP strategies companies can use to protect their AI technologies. The duo outlines the differences in trade secret protection and patent protection and other factors companies will want to consider when piecing together an IP strategy.
