Corporate IP Roundtable Webinar Will Explore AI-Assisted Drafting in Intellectual Property

Banner Witcoff's Josh Davenport will present the rapid advances in AI techniques for drafting and problem-solving at the Corporate IP Roundtable webinar on Tuesday, April 25.

The program titled, "AI-Assisted Drafting in IP: Examining Prosecution in the Post-ChatGPT World," will focus on practical applications for this new form of AI drafting, including areas where an AI drafting tool can assist patent practitioners in preparing work products and areas that fall short. As part of the discussion, we will present some real-world examples of AI-assisted drafting capabilities and shortfalls. Josh will also examine:

- Legal and ethical issues that arise when using AI tools
- Long-term practitioner pitfalls from AI tools
- Potential for providing inaccurate descriptions, and
- Concerns regarding the use of material drafted by an AI-based entirely on known information

The webinar will begin at noon CT. One MCLE credit in IL and VA will be available for attending. Other jurisdictions may be applied for. Attendees must register in advance. Click here to register.

Our Corporate Roundtable programs are intended exclusively for a corporate audience and clients of the firm. We reserve the right to refuse any registration at our sole discretion.
