EV Charging – A Study on Patent Filings as Indicators of a Changing Landscape

Banner Witcoff shareholder Justin Philpott will present “EV Charging – A Study on Patent Filings as Indicators of a Changing Landscape”at RE+ on November 17 in Las Vegas.

During his session Justin will provide an overview of the current U.S. EV infrastructure, EV charging obstacles, and technological evolutions. Justin will also explore changes in recent patent filing trends that indicate a shifting landscape in EV charging innovation, from one of hardware and physical design to a system-wide approach, focusing on building out a more reliable and accessible EV charging network.

More information on Justin’s session and RE+ can be found here.
