About *Patent Obviousness in the Wake of KSR International Co. v. Teleflex Inc.*:

The U.S. Supreme Court's 2007 *KSR International Co. v. Teleflex Inc.* brought about a significant change in patent law, specifically in the area of determining whether or not inventions are non-obvious, thus patentable. This book presents a review of how this issue, since that landmark decision, has been analyzed, applied, and considered by the International Trade Commission and the U.S. Patent and Trademark Office, the district courts of the various regional circuits, and the U.S. Court of Appeals for the Federal Circuit. This source is equally helpful to the prosecutor, litigator, student, and the academic. As cases and decisions are analyzed from each jurisdiction, one can quickly identify relevant decisions and trends within particular jurisdictions to prepare accordingly.
