

Bradley C. Wright

Attorney
Washington, DC
bwright@bannerwitcoff.com
Main: 202.824.3000
Fax: 202.824.3001

Brad concentrates his practice on prosecution, litigation and counseling in patent and copyright matters, especially in the electrical and computer areas. He has been recognized as one of the most active attorneys before the Patent Trial and Appeal Board for several years, including being named among the top 10 attorneys across the nation who represent petitioners in Inter Partes Review proceedings before the agency.

In 2020, four patents that Brad and a Banner Witcoff team drafted and prosecuted for a client were found to be both valid and infringed in federal litigation. As a result, the firm's client was awarded the largest patent verdict in U.S. history. Brad also previously drafted two patents that were successfully asserted in litigation, leading to a \$200 million settlement for his client.

Recognized as a top PTAB attorney, Brad has won several appeals before the agency and represents clients in district court litigation involving patent, copyright and trademark matters. He has also successfully argued and briefed appeals before the U.S. Court of Appeals for the Federal Circuit. Additionally, Brad has experience protecting inventions overseas under patent treaties and conventions and providing clients with infringement, validity and patentability opinions in various technical areas.

A former law clerk to the Hon. William C. Bryson of the Federal Circuit, Brad earned his electrical engineering degree from the Massachusetts Institute of Technology and his law degree, with distinction, from George Mason University, where he graduated as the top student in the Patent Law Track and was a member of the Law Review. After earning his undergraduate degree, Brad worked as an electrical engineer and software engineering manager for E-Systems, which is now part of Raytheon Corp

He is a member of the Institute of Electrical and Electronic Engineers and the American Bar Association, where he chaired subcommittees relating to business method patents, patent litigation, and multimedia and interactive technology. Additionally, Brad has been an adjunct professor of law at George Mason University School of Law, where he has taught copyright and patent law.

Brad is a past President of the Patent Lawyers Club of Washington. He has published numerous articles and has given speeches before various organizations regarding intellectual property law. Brad served as Editor-in-Chief and a chapter author of [Drafting Patents for Litigation and Licensing](#), published by BNA Books in 2008. This book, the first of its kind, was written to help patent practitioners draft the broadest possible patent that can sustain a validity challenge by synthesizing and applying lessons from the case law.
