Fax: 312.463.5001

Ronan Lonergan focuses on patent prosecution across a broad range of technologies, including mechanical, electronic, and computer-implemented systems. He has experience supporting clients in matters relating to computer and network architectures, sensor technologies and activity recognition, medical devices, athletic equipment, and software-based business solutions.

Ronan's experience also includes product management at a leading global technology company, where he worked closely with engineering and business teams to guide product development and commercialization. This experience provides him with a practical understanding of how companies evaluate innovation, develop products, and create competitive advantage, informing his approach to intellectual property strategy and portfolio management.

Ronan holds a Master of Science in Mechanical Engineering from the Massachusetts Institute of Technology, an M.B.A. from the UCLA Anderson School of Management, and an Honors Bachelor of Engineering from University College Dublin, Ireland, graduating with First Class Honors and the school's Gold Medal.
