

Push to Invent? Intellectual Property Issues for AI-Generated Inventions and Content

Banner Witcoff attorneys Josh Davenport, Scott Kelly, and Jason Shull will present “Push to Invent? Intellectual Property Issues for AI-Generated Inventions and Content” during an Arizona Technology Council webinar on Tuesday, Nov. 5, from noon to 1 p.m. MST.

Jason, co-chair of the ATC Law and Technology Committee, will serve as moderator as Josh and Scott discuss patent and copyright issues related to AI-assisted invention and content creation. The presentation will also examine who qualifies as an “inventor” or “author” for enforcement purposes and highlight early cases illustrating risks in using AI-generated material.

Attendees will:

- Learn about U.S. Patent and Copyright Office guidance on AI-generated works.
- Explore recent test cases pushing the boundaries of patent and copyright eligibility.
- Review best practices for building an intellectual property portfolio involving AI.

This webinar is free to attend. [Learn more and register here.](#)
