

Workshop: Protecting client confidentiality in the age of Gen AI

Shareholder Aseet Patel will participate in a virtual panel discussion on generative AI and protecting client data on Thursday, December 7, from 12:30-1:30 PM CT.

The panel will provide the opportunity to learn, in practical terms, how data anonymization can secure client data while expanding the data available for AI training. The discussion will also explore:

- What elements of legal documents must be anonymized?
- When is data anonymization required for using client data in AI training?
- What techniques are available to anonymize client information within legal documents, and when should you use them?
- What are the tradeoffs between anonymization and model effectiveness?
- What should firms expect of AI technology vendors in terms of anonymization?
- What tools can be deployed to make anonymization easier and more effective?
