Banner & Witcoff Breaks Design Patent Procurement Record on July 4

July 4, 2006

The recent July 4th issuances by the USPTO brings the running total of design patents procured by Banner & Witcoff on behalf of its clients to 295 *this year* –with nearly six months left. This number breaks the record for the highest number of design patents procured by a firm for its clients in a calendar year, set in 2004 by Banner & Witcoff with 292 design patents. That record had supplanted the previous record of 276 design patent, also set by B&W.

Banner & Witcoff would like to thank its design-driven clients for entrusting their design work us.

For more information on the firm's design work, please contact Robert Katz.
