Regulation and Ethics in AI-Supported Health Care

Banner Witcoff's Mercedes Meyer, Ph.D., and Sydney Huppert explore the integration of artificial intelligence (AI) into healthcare, focusing on the ethical and regulatory challenges that arise for Juriste International, the publication of UIA (United Association of Lawyers).

The article "Regulation and Ethics in AI-Supported Health Care" discusses how AI technologies can enhance patient care through improved diagnostics, personalized treatment plans, and operational efficiencies. It also highlights concerns such as patient privacy, data security, and the potential for algorithmic bias. Mercedes and Sydney also emphasize the necessity for comprehensive regulatory frameworks and ethical guidelines to ensure that AI applications in healthcare are effective and aligned with patient rights and well-being.

You can find the full article on page 17 of Juriste International by clicking here.
