Mattel

Spin Master Ltd. V. Mattel, Inc., IPR2018-01672, IPR2018-01673 and IPR2018-01674, USPTO Patent Trial and Appeal Board

Represented Mattel in three inter partes reviews, as well as in an associated patent infringement case involving Mattel’s Mecard line of transformable toys. A favorable outcome for Mattel was reached through a settlement agreement in April 2019, about one year after the complaint was first filed, and following the institution of all three IPRs. The agreement fully resolved each matter and terminated inter partes review.
